

ASHI Chapter Leaders,

The main goal of the Great Lakes Chapter of ASHI is education. Learning is a never ending process that enhances knowledge. The chapter motto is “Education will Never be as Expensive as Ignorance”.

A secondary goal of the GLC is to make our members aware of opportunities to *make more money*. As the Education Chairman of the chapter, I’m in constant search for ways to both educate our guys and to help them *make more money*.

At Inspection World ‘08 in New Orleans, I had some time to stop by the MoistureFree Warranty booth. There I learned about their new Roof Warranty program. The information looked promising to me, so I investigated it and decided it would be a good opportunity for me and my chapter members to *make more money*. In addition, it can ease some of the worries about roof failures for my home inspection clients. The warranty can protect them from monetary damage from a roof leak during the covered warranty period.

I’m happy to announce that the Great Lakes Chapter has asked MoistureFree to give a 3 hour presentation at our Spring Educational Conference in April about roof leaks and to provide our members with information about the MoistureFree Roof Warranty program. I’ve already taken the course and passed the test. I’ve already *made more money* because of this program. I encourage anyone interested to take advantage of this new offer.

Good luck and let me know your thoughts.

Sincerely,

Frank Lesh  
2007 ASHI Immediate Past President  
2008 Great Lakes Chapter Education Chairman
