For Immediate Release
January 30, 2008

We're pleased to announce that InterNACHI has evaluated the MoistureFree Certified Roof Inspection program and approved it for 2 Continuing Education Credits.

The program:

MoistureFree has created a new income opportunity for residential home inspectors – as a ***MoistureFree Certified Roof Inspector***. Homebuyers, Realtors, Builders, and Homeowners wanting a roof evaluation along with warranty protection will require an inspection conducted by a ***MoistureFree Certified Roof Inspector***. A training & certification program for roof inspectors has been created to educate inspectors in the proper installation of roofing materials and in effective inspection techniques. Upon review and successful completion of the online test, the inspector is awarded distinct status as a ***MoistureFree Certified Roof Inspector***.

MoistureFree Warranty Corporation is a leading warranty company protecting thousands of stucco homeowners from moisture intrusion with the nationally-recognized MoistureFree Warranty. With consumers demanding more and more protection, MoistureFree has created the ***MoistureFree Roof Performance Warranty*** for existing roofs as well as for new roofs. In order for consumers to acquire this unmatched 3rd-party protection, a ***MoistureFree Certified Roof Inspector*** must first conduct an inspection.

MoistureFree Certified Roof Inspectors can diversify their services by offering clients this level of inspection service, as well as informing them of their eligibility to purchase warranty protection. Also, ***MoistureFree Certified Inspectors*** will earn additional income from fees paid by MoistureFree for Quality Assurance Inspection details. MoistureFree also encourages the ***MoistureFree Certified Roof Inspector*** to build his own network of local, experienced ***MoistureFree Certified Roof Installers***. The inspector's network will earn him further income from all warranties sold to the independent roofing firm's clients by MoistureFree.
